Prezzo Euro 1.300 - IVA inclusa

Musical Fidelity MVX-2 Preamplifier

Special features: 2 phono inputs – 1 MM and 1 MC
Very rare and 'most wanted' for its quality

Size: W 482×H 73× D390 mm - Weight 8.5kg
Comes with separate power supply box
1 pc. Ex-demo available in excellent condition

Price 1,300 euro - VAT included

Designed for tonal purity and sound resolution, the MVX.2 is an ultra-high quality studio standard preamp with several Musical Fidelity innovations. These include the hybrid bi-polar mosfet phono stage, and the output stage, which is a pure Class A line amp driving a studio-spec line input matching transformer. The power supply uses two-stage choke regulation to ensure that ripple current noise is virtually non-existent on the power supply line. To ensure that no noise reaches the active electronics, each stage is separately regulated with a series shunt regulator circuit exclusive to Musical Fidelity.
